

MAKING YOUR DREAMS A REALITY

FITTING INSTRUCTIONS

BPCH-9108 Rear Hugger/Chain Guard (Carbon), VJ22 RGV250

This hugger is designed to be installed on all models of the VJ22 RGV250.

We supply mounting hardware with this product, and due to the difference in design of the 'banana arm' to the braced type, the hugger needs two bushes installed between the hugger and the mounting tab only on the braced type as shown in the photos. For the banana arm, just install the 4 M6 x 10 bolts in all four hole without the bushes. For the braced type swing arm, use 2 x M6 X 10 on left side and 2 x M6 X20 on the right side along with bushes BPSY-0287.

For "Banana" Type Swing arm use 4x M6x10

For Braced type Swing arm use 2x M6x20 + 2x Bush and 2x M6x10

RIGHT SIDE BRACED TYPE SWING ARM
